

Tech Stack

On this page you will find a regularly updated list of the stack in use for development. The stacks are divided into universal, frontend and backend stacks, but generally referred as the stack in total.

Internal Tools ☐

- [Slack](#) (Chat)
- [ClickUp](#) (Issue tracking and more ☐)
- [OnTime](#) (Timetracking ☐)

Frontend ☐

- [React](#) (Javascript Framework)
 - [Typescript](#) (strictly typed Javascript)
 - [NextJS](#) (React Boilerplate)
 - [Apollo Client](#) v3 (Graphql Client)
 - [RecoilJS](#) (State management)
 - [TailwindCSS](#) (Css framework for styling)
 - [date-fns](#) (Date manipulation and helpers)
 - [formsy](#) (React form components)
 - [jest](#) / [react-testing-library](#) (testing toolset)
- Flutter (Mobile development)

Backend ☐

- PHP
 - [Laravel](#) (PHP framework)
 - [Docker](#) (Development and Production Environments)

- [Ubuntu](#) (Server OS)
- Lighthouse (GraphQL Package for laravel)
- Redis (Key/Value Storage DB)
- PHPUnit (Unit tests in PHP)
- NodeJS
 - NestJS (NodeJs Framework) / Prisma
 - TypeORM (ORM)
 - NextJS/GraphQL (GraphQL Package)

DevOps / DevTools ☐

- [Docker](#) (Dev Environment) / docker-compose
- [Git](#) (VCS)
- [Insomnia](#) (API Client ☐)
- [Ngrok](#) (Secure Dev Env tunneling)
- [Gitlab](#) (Git and dev ops platform)
- Gitlab CI (Continuous Integration)
- Gitlab Containers (Private Docker Image Hosting)
- [SonarQube](#) (Automated Code Quality testing)
- [Cypress](#) (Frontend e2e testing)
- [Browserstack](#) (Cross Browser testing)
- [Kubernetes](#) (Hosting fail safe applications)
- [Sentry](#) (Logging/Exception Management)
- [Brevo / formerly Sendinblue](#) (Mail sending provider)
